We are pleased to see the efforts everywhere made to make the most of the money crash, by infusing a confidence that the crises will soon be over. We wish it may be so; but it will be the first instance of a general suspension followed by a speedy resumption. The causes that have produced it, have been at work, since 1846, and it is much to be feared that the effects will not soon cease. The suspension of "37"-induced by a low tariff and consequent overtrading-was not followed by full resumption until "44," a period of seven years. The same state of things exists now-brought about by the same causes, and he is over-sanguine who looks

for a greatly different result. The policy of this government is to discourage American industry for the benefit of European labor, and American laborers ars the instruments by which this policy is carried out. They are now reaping their reward-poverty and suffering are at their door, whilst the wages they ought to be earning, are going into the pockets of foreign laborers, who are profiting by the folly of bogus democracy .-If our laborers will not profit by experience, let them suffer-as the tools of locofocoism, they deserve no better fate.
